EDUCATION

University of Central Punjab <i>Bachelor of Science in Software Engineering</i>	Lahore, PK 2021-2025
Government College University (GCU) <i>ICS - Intermediate</i>	Lahore, PK 2018 –2020

EXPERIENCE

Flutter Developer <i>CofCode</i>	June 2025 – Present Lahore, PK
<ul style="list-style-type: none">• Worked on multiple production-level Flutter applications, contributing to performance optimization, UI polish, and seamless user experience.• Integrated RESTful APIs and real-time data flows to support dynamic features across deployed apps.• Implemented clean architecture, modular code structure, and reusable components to ensure long-term maintainability.• Enhanced skills in state management, API handling, and third-party packages .• Delivered end-to-end features within tight deadlines while collaborating effectively with cross-functional teams.• Contributed to publishing and maintaining apps on the Play Store and App Store, including bug fixes, updates, and performance improvements.	
Flutter Intern (On-site) <i>CFITS</i>	Mar 2025 – April 2025 Lahore, PK
<ul style="list-style-type: none">• Contributed to multiple Flutter projects with focus on performance and UI refinement.• Integrated REST APIs to enable real-time data communication and dynamic content.• Applied clean architecture and modular design principles for maintainable code.• Enhanced skills in state management, API handling, and third-party packages .• Delivered features on time while working within deadlines and team collaboration.	
Flutter Intern (remote) <i>DevelopersHub Corporation</i>	Jan 2025 – Feb 2025 Lahore, PK
<ul style="list-style-type: none">• Developed and deployed several Flutter projects, demonstrating self-driven problem-solving.• Received recognition for advancing skills and consistently delivering projects on time.• Successfully managed projects within budget constraints.	

PROJECTS

RideHoppy - Ride-Sharing App (Customer & Driver) <i>Flutter, Firebase, Dart, Git</i>	July 2025 – Oct 2025
<ul style="list-style-type: none">• Built a dual-app ride-sharing platform similar to Uber, including separate Customer and Driver apps.• Implemented real-time ride requests, driver tracking, and live location updates using Firebase and maps integration.• Developed features like fare estimation, route navigation, in-app chat, and trip history.• Designed a smooth and modern UI for both apps, focusing on user experience and performance.• Integrated secure authentication, wallet management, and push notifications for rides and updates.	
PcGenius - FYP Link <i>Flutter, Firebase, Dart, Git</i>	June 2024 – Jan 2025
<ul style="list-style-type: none">• Developed a custom PC-building platform with real-time component selection and pricing.• Displayed the complete build alongside an estimated price for user convenience.• Designed an intuitive interface to simplify PC-building for all skill levels.	
Task Management App Link <i>Flutter, Provider, Firebase, Dart, Git</i>	Jan 2025 – Jan 2025
<ul style="list-style-type: none">• Built a task management app with real-time CRUD functionality using Firebase.	

- Integrated Firebase Authentication for secure user login and logout.
- Utilized Provider for efficient state management and enhanced app performance.

Chatting App | [Link](#) | *Flutter, Provider, Dart*

Dec 2024 – Dec 2024

- Developed a basic chatting application with real-time messaging and dark theme support.
- Implemented Provider for efficient state management and seamless user interaction.
- Focused on creating an intuitive UI and maintaining performance across different devices.

Bus Transportation System | [Link](#) | *MySQL, Backend Development*

June 2023 – July 2023

- Created a role-based bus system with MySQL for route and schedule management.
- Applied OOP principles for efficient data handling and scalability.
- Ensured system reliability through testing and optimized queries.

AlphaTech Online Shop | [Link](#) | *C++, Visual Studio*

Feb 2023 – March 2023

- Developed a role-based e-commerce platform for tech products using C++.
- Created modular classes for product management with OOP principles.
- Implemented admin and user interfaces for inventory, login, delivery options, and order tracking.

TECHNICAL SKILLS

Languages: Dart, SQL, C/C++, HTML/CSS

Frameworks & CMS: Flutter , WordPress, Shopify

Developer Tools: Git, Android Studio, VS Code, Visual Studio, Postman, StarUml , MySql Workbench

Database & Backend Tools: Firebase, MySQL
